John Deere 115 Lawn and Garden Tractor Technical Service Repair Manual

This individual Shop Manual is one unit of a series on agricultural wheel type tractors. Contained in it are the necessary specifications and the brief but terse procedural data needed by a mechanic when repairing a tractor on which he has had no previous actual experience. The material is arranged in a systematic order beginning with an index which is followed immediately by a Table of Condensed Service Specifications. These specifications include dimensions, fits, clearances and timing instructions. Next in order of arrangement is the procedures section. In the procedures section, the order of presentation starts with the front axle system and steering and proceeds toward the rear axle. The last portion of the procedures section is devoted to the power take-off and power lift systems. Interspersed where needed in this section are additional tabular specifications pertaining to wear limits, torquing, etc.

John Deere 125 Lawn and Garden Tractor Technical Service Repair Manual

by Andrew Shanks, Martynn Randall This updated edition covers a representative selection of the most popular lawnmowers from current models to those bought up to ten years ago. It presents the dismantling, overhaul and re-assembly of each popular engine in a logical sequence with step-by-step photos. Each engine overhaul is accompanied by a table listing all the lawnmowers in which the engine is used. There is also information on preventative maintenance, detailed coverage on buying a mower and safety procedures.
